

Breakthrough Podiatry

A revolution in foot care

Newsletter March 2007

Super Sandals! Allison, a 35 year old female patient presented to Breakthrough Podiatry complaining that it's almost summer and she doesn't want to wear athletic shoes when it is hot. Breakthrough Podiatry successfully treated Allison for her chronic plantar fasciitis several months earlier. She admits that "she can't go without her orthotics during the day without having a return of her pain," but now she demands an attractive summer shoe alternative!

Fortunately for Allison, Breakthrough Podiatry, carries many different styles of sandals that attractively accommodate a custom foot orthotic! Allison was able to order a second pair of orthotics and an attractive summer sandal from Breakthrough Podiatry. She was then able to keep her feet cool in temperature and in style throughout the summer!

Because of the advanced in-house ability to construct custom foot orthotics, Dr. Williams Staff can quickly create a secondary orthotic device for patients. Also, thanks to the forward thinking of Breakthrough Podiatry, Dr. Williams has been able to provide many differing styles of sandals to meet most any style and foot size need!

Physicians can combat chronic foot related conditions by being aware that Dr. Williams and Breakthrough Podiatry offer many shoe and sandal styles to compliment custom foot orthotics. Then referring those patients to Breakthrough Podiatry, where patients will benefit from the latest ground-breaking treatment methods to obtain exceptional outcomes.
