

# Breakthrough Podiatry

## A revolution in foot care

Newsletter November 2006

**Outstanding Orthotic Outcomes!** Steve, a 30 year-old accountant and high school basketball referee, presented to Breakthrough Podiatry stating that he needed new foot orthotics. He had foot orthotics from a podiatrist in Ohio where he used to live, but they didn't seem to be helping him anymore. He states "I never really had any specific pain, but I know my feet worked better with the orthotics and I want some new ones ASAP! Can you help me run the court pain free again?!"

Steve's generalized foot pain is caused by a combination of different podiatric disorders. Often patient's experience non-specific pain in their feet, ankles and legs from simple biomechanical failures that cause a delay in the ability of the foot to roll uninterrupted from the heel, at the ankle, and finally by extending at the toes.

Breakthrough Podiatry's expert, innovative podiatric treatment approach considered his entire body, lower extremities, and foot function to attain results that few others can achieve. By harnessing the power of advanced medical technologies, such as computerized digital foot scanning and in-house CAD/CAM design and manufacture of his orthotic devices, Steve received his orthotic devices within a week and was liberated from pain in 3 short visits.

Physicians can combat non-specific foot pain by being aware of the most common symptoms and then referring them to Breakthrough Podiatry, where patients will benefit from the latest ground-breaking treatment methods to obtain exceptional outcomes.

### Common symptoms include

- 1) Chronic non-specific foot, ankle or leg pains.
- 2) Pain with standing and walking all day .

### Advanced Medical Technology:

- 1) Digital foot scanning for prescription orthotics.
- 2) In-house CAD/CAM manufacture.
- 3) Quality devices with Quick Turnaround time.

Lead by Bruce Williams, Doctor of Podiatric Medicine, Breakthrough Podiatry challenges convention to deliver outstanding results, reduce failed podiatric therapies, and improve foot health. The majority of Breakthrough Podiatry patients overcome pain in 5 treatment visits or less.
